

# Waterfront UTC

Help shape the future talent in the engineering,  
construction and design industries

**Support the next generation of engineering, construction and design experts**

The University Technical College, based in Chatham Maritime, is a different type of school for 14 - 19 year olds wanting to lay strong career foundations in some of the most important industries worldwide. Students receive hands-on, practical tuition in engineering and construction, with a focus on design technologies, alongside traditional academic studies.

Partnerships with world-class companies, colleges and universities give students the opportunity to kick-start their future careers. Waterfront UTC provides education for the jobs of tomorrow.

By providing real-time projects and academic rigour, the UTC environment equips students with the **specialist skills, practical knowledge and academic know-how** to fully realise their potential in the modern world of work.

## How your organisation can get involved...

Waterfront UTC runs a range of educational programmes that benefit from your company's involvement:

- **Industrial Projects Programme.** A programme that provides stimulating 'real' industrial projects for our students, to provide them with learning opportunities to gain knowledge and insight into the requirements of the industry.
- **Industrial Site Visit Programme.** A programme that gives our students the opportunity to visit industrial sites to gain understanding of the work environment.
- **Visiting Lecture Programme.** A series of lectures and/or demonstrations based at Waterfront UTC and delivered by visiting professionals and experts in their field of practice.
- **Apprentice Ambassador Programme.** We encourage apprentices from the industry to help promote the UTC and their chosen field of study; and also to become mentors for our students.
- **Work Experience** for P16 students.
- **Industrial Mentors** to provide insight and up-to-date guidance into the industry to Waterfront UTC staff and students.

## Key benefits for your organisation...

- Ensuring that the future generation of professionals are equipped with the knowledge and understanding of the requirements of your industry.
- Having first hand knowledge of and direct access to potential future employees.
- Developing your own staff, by providing them with opportunities to develop, mentor and coach the future generation.
